

SYSCALL SDK

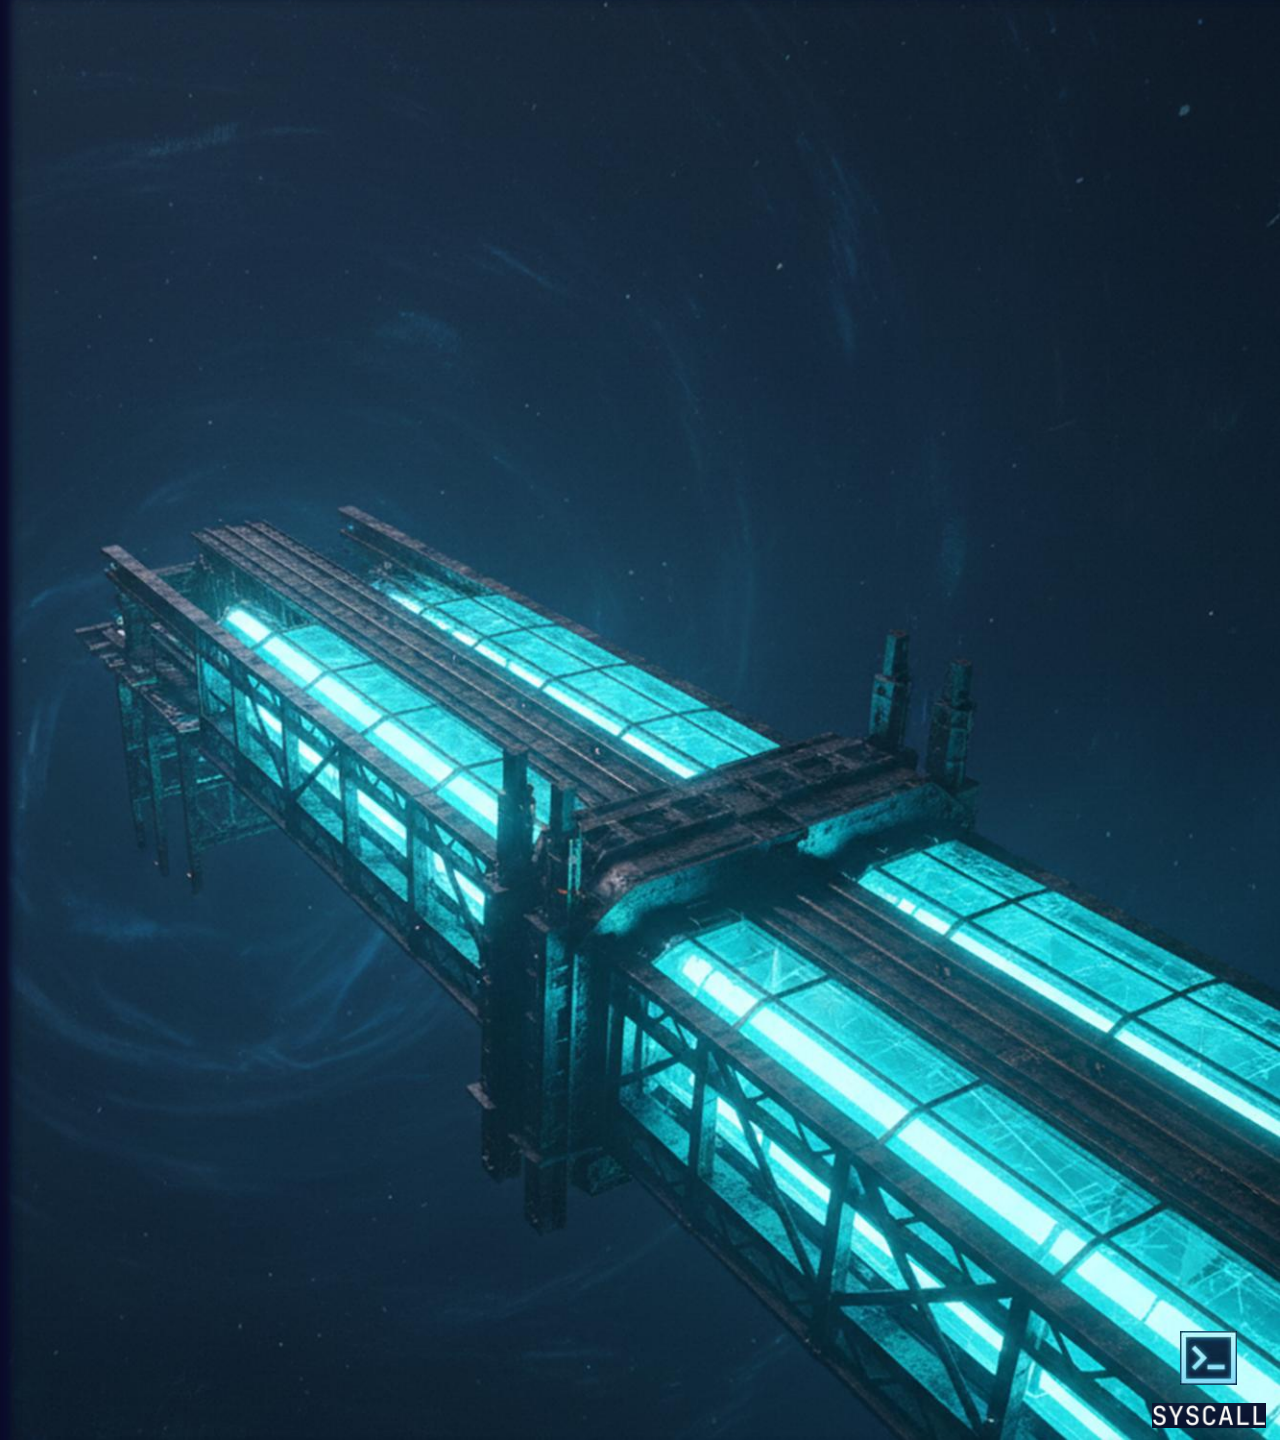

The Reverse Oracle for the EVM Era.

THE GAP

Smart Contracts are Mute.

- Input is solved (Chainlink).
- Output is missing.
- Current Friction: KYC + Credit Card required.

THE SOLUTION

Trigger Actions from Solidity.

- Unified Interface (SMS/Email).
- No Credit Card (Pay in ETH).
- Permissionless.

ARCHITECTURE

- Stateless Auth (Short-lived JWTs).
- Trustless (On-chain verification).
- Modular (L2 Ready).

L2 ECONOMICS (<\$0.01 Gas) | AI AGENTS (Need Output) | DEPIN (Needs Infra)

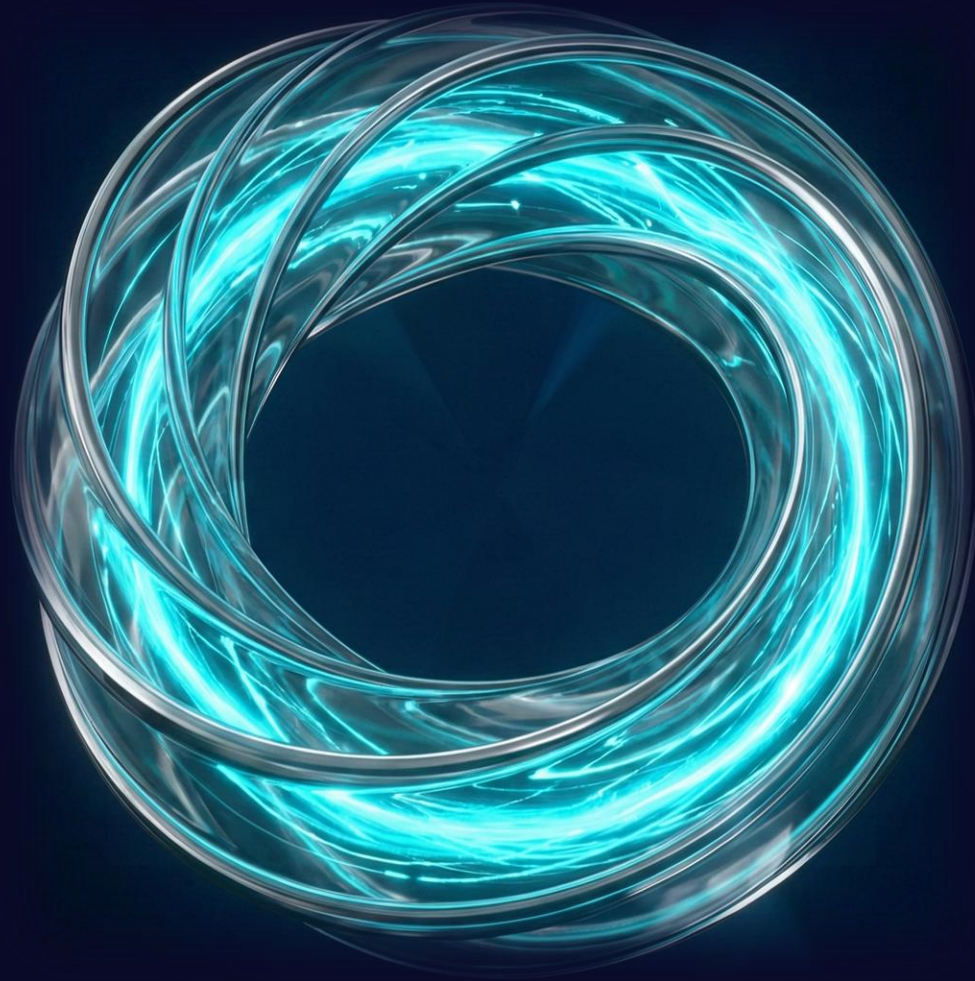

LIVE ON TESTNET

- < 4s Latency.
- v0.1.0 Functional.
- Full Loop Working.

- User pays in ETH.

- Protocol takes Fee.

- Relay executes Action.

ROADMAP

- Q1 (Now): Centralized Bootstrap.
- Q2 (Seed): Batching & L2.
- Q3 (Series A): Decentralization.

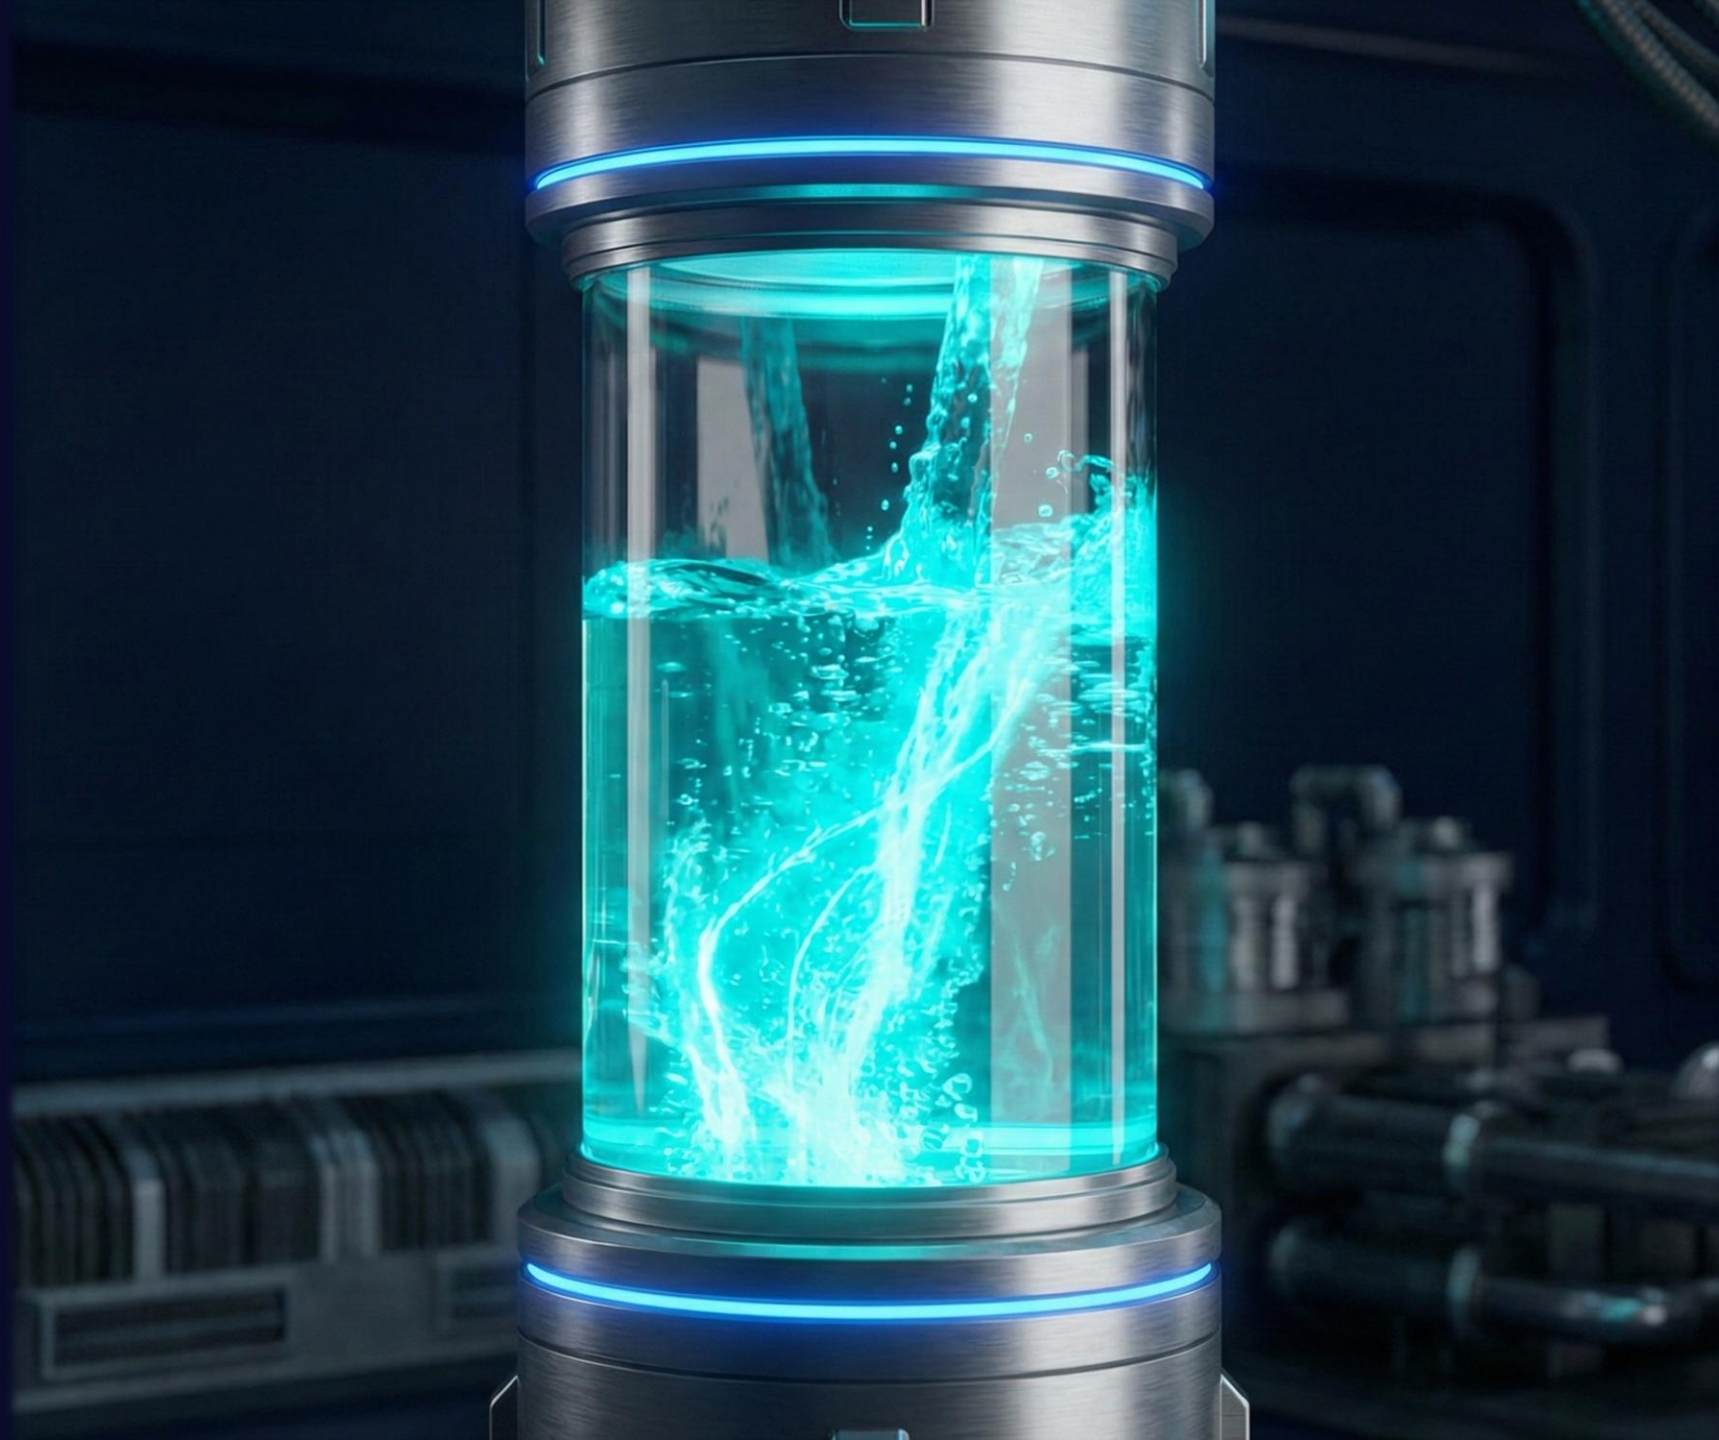

RAISING

\$500k

Pre-Seed Round

- 60% Engineering.
- 20% Audit.
- 20% Ops.
